LO: To know the role that money plays in our lives?

Our PSHE for the next few weeks is focusing on understanding money and how this affects our lives and the choices we make. In your work pack, there are some activities and scenarios that can support this learning, however they may be difficult to complete at home. Work through this sheet to support your understanding. There is also a PowerPoint to help you.

Think about your views on jobs and work. Why do you think that people work?

Do you think that money is important to people when they choose a job? What things do you think might be equally, or more important?

Why do some jobs pay more than others? Do you think that this is right?
