ASHTON WEST END PRIMARY ACADEMY CLEANING RISK ASSESSMENT

Risk Ratings	Example impact (Including but not limited to)
High	Likely to happen and likely to result in the fatality of one or more individuals. Potential for a frequently occurring serious and life threatening injury
Medium	Unlikely to happen but if it did it would certainly result in at least minor illness, injury or equipment damage. Could occasionally result in a serious injury, illness or equipment damage. Although rarely, could result in death or serious and life threatening injuries.
Low	Unlikely to occur but if it does it is likely to result in minor illness, injury or equipment damage and could, but is unlikely to, result in a significant injury, illness or equipment damage with over 3 days absence

Introduction

Ashton West End Primary Academy will ensure, so far as reasonably practicable, that all staff, pupils, contractors and visitors are protected from the risks of contracting Covid-19 whilst on the premises

Objective

It is the objective of Ashton West End Primary School to prevent the potential spread of covid-19 by implementing the measures as outlined below.

Personal Protective equipment

To help protect the cleaning staff from the possibility of contracting covid-19 it will be the schools policy that P.P.E will be worn at all times while cleaning duties are carried out within the school, this will include but will not be limited to disposable aprons and gloves. In addition to this each member of the cleaning team will have the optional use of eye protection and face mask.

The use of P.P.E

ASHTON WEST END PRIMARY ACADEMY

CLEANING RISK ASSESSMENT

Each member of the cleaning staff will be expected to wear a new pair of gloves and apron for each of their duties i.e. change for a new set when completing one area before moving on to the next area so to help prevent the potential spread from one area to another. Each member of staff will sign to say they understand and will comply with this.

It will be recommended to all the cleaning team that they follow good practice by regularly washing their hands between duties where possible and where not by using hand sanitiser provided in each classroom. In addition, it will be expected that hands are washed prior to and post shift.

Disposable P.P.E, once used is to be double bagged in black bin bags tied and stored in the marked contaminated P.P.E container within the bin storage area for no less than 72 hours prior to it being disposed of in the general waste as per government guidelines.

Cleaning chemicals and cloths

- All hard surfaces will be cleaned using D10 Sanitiser with the exception of washrooms, hard surface cleaner may be used in addition not as substitute should it be necessary
- All floors will be cleaned using bleach and hot water.
- Washroom hard surface areas will be cleaned using Germicidal washroom cleaner.
- The use of disposable cloths will be implemented forthwith, Green for general areas and red for washrooms these will be used for one area only and disposed of with soiled P.P.E as mentioned above. Should it be required then green scouring pads may be used on stubborn stains for individual areas and disposed of in the same way as other disposable cloths.
- Used mop water is to be disposed of at the nearest outside grid.

Cleaning and sanitising of cleaning equipment.

It will be expected that any equipment used during cleaning duties will be cleaned and sanitised after each use. Mops are to be soaked in hot water and bleach between use and heads changed on a regular basis. Wet floor signs are to be sanitised daily.

Cleaning time

Additional time will be allocated to some members of the cleaning staff as is deemed necessary in line with operational requirements to meet the needs as identified in certain areas i.e. early years.

Supplementary cleaning will be carried out during the lunch time period in heavy traffic areas and those areas deemed as high risk.

Donna Quinn, Noreen Akhtar, Yvonne Jackson and Stacey Pomfret will be on a rota to clean classrooms at lunchtimes.

Cleaning Routines

ASHTON WEST END PRIMARY ACADEMY

CLEANING RISK ASSESSMENT

All cleaners will only enter their own designated areas before which they will be expected to be wearing full P.P.E provided. Once they have entered an allotted area they will not exit and re-enter thus to reduce the risk of spreading any potential contamination. Once an area is completed then disposables will be double bagged and inserted in the allotted container. Before moving from one area to another handles of mops and wrings and any other equipment must be sanitised using D10 sanitiser provided.

Classrooms and regularly used areas

All staff will be encouraged to follow best practice advice and wash their hands regularly, however each classroom and regularly used area will be issued with a bottle of 70% Alcohol hand sanitising rub for use of staff when they are unable to wash their hands.

A trigger spray bottle of D10 sanitiser and disposable cloths will be issued to each area and staff encourage to regularly wipe down any commonly used surface such as keyboards, mouse and door handles to name but a few.

Those rooms that have sinks will be issued with soap and children encouraged to wash their hands on a regular basis, blue roll will be available to dry hands.

Washroom Areas

In addition to liquid soap provided by the dispensers each washroom will be stocked with bars of soap.

Signage

Signage will be displayed within school to encourage children and staff to wash their hands, together with signage and any other appropriate markings deemed necessary to implement social distancing.

Site Managers Office

Only one member of staff will be allowed in the site managers office at any given time, before entering sanitising hand rub must be applied without exception. No soiled P.P.E is to be taken in and equipment cleaned and sanitised before it is returned.

Use of shared equipment

Areas where equipment is shared such as photocopiers and computers, D10 sanitiser has been issued to these areas where it is expected that the equipment and surrounding area is wiped before and after use using the sprays and cloths provided.

Staff

All staff will be encouraged to follow guidelines on best practice, follow any orders they are given and exercise common sense where possible.
